### **NOTES ON CHART:**

<sup>n</sup> = All authorization levels were the same throughout FY 05 – FY 08 except where noted.

**n/a** = not applicable

ss = authorized at "such sums as may be appropriated" rather than a specific dollar amount

# = Items with number sign (#) are "mandatory" programs funded directly via the farm bill through the Commodity Credit Corporation or directly from the Treasury that do not need to be appropriated, though sometimes appropriators raid the mandatory funding via "limitations" provisions. Some mandatory accounts receive the same funding level each year, but others vary by year.

*Discretionary Programs.* These programs are authorized by the 2008 Farm Bill, an earlier farm bill, or another agricultural authorization bill but the actual funding level for the program in any given year is determined by the annual appropriations bill. Discretionary programs also include programs without specific authorizations that are started by USDA under more general authorities.

*Mandatory Programs.* These programs were provided mandatory (direct) funding in the 2008 Farm Bill, 2002 Farm Bill, or some earlier authorization bill, not normally subject to change in the appropriations bill. However, over the years, the appropriations committee has perfected a technique to limit or eliminate mandatory spending by not providing appropriated funds to pay for the salaries and expenses of USDA staff to implement the program. This allows the appropriators to kill or limit the program in question and then spend the money saved on discretionary programs.

No Limitation means that the mandatory funding provided by the farm bill (see the shaded columns) was left intact at the farm bill level for mandatory funding.
